PSEMS 5 DAY WORKSHOP

INTERPORTPOLICE

ENHANCE YOUR SECURITY CULTURE, MINIMISE YOUR RISK, AND IMPROVE SECURITY ASSURANCE

Develop a systematic approach to your organisations security. This 5 day workshop will provide participants with a broad and detailed understanding of how to implement and maintain a Security Management System

PORT SECURITY MANAGEMENT SYSTEMS

SEMS: WHAT AND WHY

SeMS is a business practice that is part of the day to day activities of an entire organisation. A SeMS comprises processes that are used across an organisation to provide a proactive approach for assessing and managing security risks. SeMS is not a piece of technology nor is it simply a set of documented procedures; it brings together a range of processes including governance, communication, and risk management and ensures that they are documented and implemented effectively. SeMS can help to reduce gaps in the management and assurance of security and is a fundamental building block for enhancing security effectiveness.

GOVERNMENT ORGANISATIONS, REGULATORS, LEGISLATORS, ORGANISATIONS WITHIN CRITICAL NATIONAL INFRASTRUCTURE (RAIL, MARITIME, ENERGY, HEALTH SERVICES, FINANCE, ETC) AND ALL SERVICE PROVIDERS AND SUPPLIERS, WITH SECURITY, SAFETY, OR QUALITY MANAGEMENT OBLIGATIONS AND RESPONSIBILITIES."
